## Bredemann Ford Purchase Advantages:

1. **50 Free Service Loaners by appointment** - We provide loaners to Bredemann Ford purchasing customers. Requires driver's license, insurance card, and credit card. Must be at least 21 years old.
2. **Shuttle Service** - Shuttle service available to your home, place of work, or business within a 5-mile radius.
3. **Appointments** - Dial Direct (847) 510-5560. Set up a time convenient for you. Reserve a free service loaner if you purchased this vehicle from us.
4. **After Hours / Drop Off** - The key box is located on the southside of the showroom 24 hours a day. We will call early next morning to confirm what you need.
5. **Free Car Wash** - Inside and out during each service visit.
6. **Warranty** - 12 month/12,000 mile service parts warranty backed by Ford Motor Company dealers throughout the United States.
7. **\$500 Bonus Offer** - Details in this brochure.

## What do I bring?

- This Service handbook for verification
- Extended Warranty Contract, when applicable

## Ford Roadside Assistance:

**1-800-241-3673**

## Dear Bredemann Customer,

Thank you for your purchase. This maintenance guide is being provided to explain the service requirements and recommendations for your vehicle. It also points out the special benefits you will receive because you are a Bredemann customer. Our goal is to provide you with the best service experience you have ever had.

We commit to proactively advise you:

1. When your vehicle needs service.
2. When we offer discount coupons and special pricing.
3. When your special order part arrives to complete a repair.
4. When a manufacturer special service message needs to be addressed.

We will keep you informed of items such as these in the most convenient format just for you:

1. E-mail
2. Telephone
3. Postcard / Letter
4. Direct Mail

Please let one of the members of our service staff know which method you prefer.

In the event your vehicle needs any services or repairs we want to address them before they become a problem. We have an inventory of over 25,000 parts, including over 200 tires as part of \$200,000 in dedicated Ford parts inventory to provide for your vehicles' maintenance needs.

Our parts inventory, trained technicians, extended hours and competitive pricing are all aimed at making Bredemann Ford your first choice when servicing your vehicle.

Sincerely,

***Bredemann Ford  
Service Staff***

### HERE IS WHY WE DO IT:

The 3,000-scheduled maintenance interval is designed to get the optimum ownership value from your Ford vehicle while helping to maximize its performance, safety and reliability. How much maintenance your Ford vehicle requires depends on how you drive, as well as the conditions in which you drive. Depending on time or mileage, your Ford vehicle may require more frequent oil changes.

## 6,000-MILE SERVICE

- Change engine oil
- Replace oil filter

### HERE IS WHY WE DO IT:

Keeping your Ford vehicle in top condition and maintained according to factory requirements involves more than an oil change. Due to city driving conditions, we recommend changing your vehicle's air filter. The rubber on your wiper inserts may have deteriorated because of weather. We recommend replacing them once a year or at 15,000 miles, whichever occurs first. Exhaust pipes, mufflers and hangers are inspected for cracks, deterioration or damage.

## 18,000-MILE SERVICE

### Service Hours

Mon-Thur: 6AM - 9PM

Fri: 6AM - 7PM

Sat: 7AM - 3PM

## HERE IS WHY WE DO IT:

Your Ford vehicle is now due for its first major service. Our technicians use specialized equipment to be sure that all the mechanical, electronic and computer devices are working properly. At this time, we also recommend replacing the coolant. Over time, your engine coolant becomes contaminated, losing its ability to protect your engine from freezing in cold weather conditions. In addition, the transmission fluid is flushed. Over time, the fluid will breakdown and may not lubricate and protect the internal parts as needed.

## ADDITIONAL SERVICES

### Complete Cooling System Service

When a motorist becomes stranded at the side of the road, one of the most common reasons is cooling system failure. The purpose of coolant is to enable your engine to operate at a broad range of temperatures. Over extended use, this coolant gradually begins to deteriorate, leaving it unable to protect the cooling system from rust, corrosion and other harmful deposits. Any restriction at all in your cooling system will affect the system's ability to cool your engine. Eventually, the system will fail, leading to engine breakdown. Using our state-of-the-art equipment, a trained technician will use a pressurized flush to force the old fluid out, disposing of it properly. New coolant will be installed. The ultimate goal is to prevent overheating, control rust and corrosion, and extend coolant life.

Corroded radiator

Clean radiator

### Complete Power Steering Service

The tremendous convenience of having power steering is something we take for granted – until something goes wrong. The system uses hydraulic power, which is provided by a rotary-vane pump that is in turn powered by the engine. Because the system is exposed to hot temperatures and high-operating pressures, fluid tends to deteriorate over time. In addition to becoming contaminated with varnish deposits and other debris picked up throughout the system, the fluid also can lose its lubricating properties. This results in steering “stiffness,” leaks and, potentially, complete system failure. As part of our Complete Power Steering Service, a trained technician will thoroughly flush out the old power steering fluid, disposing of it in an environmentally safe manner. We then will install new power steering fluid. Following this service, you should receive more responsive performance and increased vehicle control.

Dirty power steering fluid

Clean power steering fluid

### Complete Transmission Service

The transmission is one of the most sophisticated pieces of equipment in your vehicle's engine. The transmission valve body controls all hydraulic shifting for your vehicle. The valve body consists of numerous valves, springs, hydraulic passages and electric solenoids. A regular transmission service will usually drain only about half of the old fluid from the valve

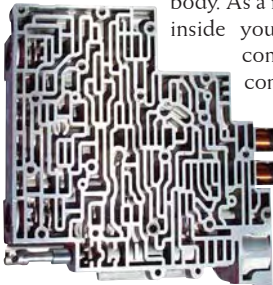

Dirty transmission valve body

body. As a result, there are contaminants that will remain inside your transmission once this basic service is complete. These contaminants can potentially cause the intricate

components within the transmission to fail, resulting in costly repairs.

Our Complete Transmission Service is a combination of a flush and fluid exchange. Using state-of-the-art equipment that is operated by an expertly trained technician, we will completely remove all contaminants before fresh fluid is installed. This service is designed to promote smoother shifting while protecting the various components within the transmission.

Clean transmission valve body

## BRAKE FLUID SERVICE

Brake fluid over time will breakdown from moisture and temperature changes to the fluid from normal brake use. Brake components such as calipers, wheel cylinders, master cylinder, brake lines may leak prematurely when fluid is not replaced at regular maintenance intervals. We recommend flushing brake fluid every 2 years or 30,000 miles for optimum protection to brake components.

*Our Parts Department stocks over 200 tires. Many brands and sizes for most Ford products.*

Here are 500 more reasons to shop at Bredemann Ford!
