

***Volvo C70***  
***Accessories Listing***

## *Trailer Hitch*

*\$1228 installed*

The tow hitch is uniquely designed for the C70 and is only suitable for the North American markets. It has been thoroughly tested both in the laboratory and on the road. It is designed for durability and towing capacity. The tow hitch consists of three main sections: cross member, ball mount and a 1 7/8" diameter ball. The ball mount is very simple to use. If you want to remove it, simply remove a spring pin. If you choose not to have the ball mounted, there is a neat protective plug which shields the hole in the mounting tube.

### **Technical data**

Towing weight:	910 kg/ 2000 lbs
Tow ball diameter:	1 7/8 class 1
Tow ball load:	75 kg/ 165 lbs
Approved in accordance with:	VEESC V5

## *Wind Deflector*

*\$460 installed*

The Volvo C70 wind deflector blocks the turbulence from wind resistance for the driver and front passenger. The wind deflector is located behind the front seats and consists of an upright vertical and a horizontal guard that covers the entire rear passenger compartment. The car, if factory-equipped with mounting points in the rear side panel, makes the wind deflector simple to mount and remove. When not in use, the wind deflector can be simply and easily removed and folded twice. Thus it takes up little room when stored.

## *Rubber Mats*

*\$102*

A complete floor mat in rigid natural rubber with surrounding high-raised edges. There is also a raised edge around the fitting holes which effectively prevents dirt and water penetrating underneath.

## *Tunnel Mat*

*\$18*

A protective mat that lays over the tunnel in the rear seat which protects the car's original carpets from dirt and wear. Especially suitable when carrying three passengers on the rear seat.

## *Booster Seat & Backrest*

*\$164*

Give your child a safe and comfortable journey. Used together with normal seat belt and provides the belt with correct alignment to the child's body for optimum grip in the event of a collision. The child will also sit higher up and have a better view. Seat is intended for children between 3 and 10 years, weight 15-36 kg (33-80 lb.) The angle of the backrest can be adjusted to give your child a more comfortable sleeping position. It can be set to five heights and two different backrest angles, increasing the protection for the child's neck and back.

### **Facts and Advantages**

- Crash-tested and approved according to standards ECE R44-03 and FMVSS 213
- The design of the upholstery matches the child seat
- Washable upholstery
- Fits all cars with 3-point seat belts
- The backrest provides extra comfort and protection in the event of a collision from the rear
- The backrest is adjustable; there are 5 different heights and 2 backrest angles.

## *Rear Park Assist*

*\$860 installed*

Rear parking assistance warns of obstructions behind the car when you reverse, e.g. with parking. The system is activated when reverse gear is selected. The volume of the radio/stereo is lowered and a pulsating "buzzer tone" is heard from the car's rear loudspeakers. The tone starts when the obstruction is about 150 cm away and increases to a continuous tone when it is less than 30 cm away from the rear bumper. The kit comprises four sensors that are mounted almost out of view in the rear bumper, a control module, wiring and a button in the center console. The system can be switched off manually using the button in the center console.

## *Front & Rear Park Assist Package \$1809 installed*

This is a complete kit that is comprised of both front and rear parking assist.

Front parking assistance is an excellent system that warns of obstructions when you have limited space in front of the car, e.g. with tight parking. It can only be used in combination with rear parking assistance.

Rear parking assistance warns of obstructions behind the car when you reverse, e.g. with parking. The system is activated when reverse gear is selected. The volume of the radio/stereo is lowered and a pulsating "buzzer tone" is heard from the car's rear loudspeakers.

The system can be switched off manually using the button in the center console.

In order to differentiate between the front and rear systems, different tone frequencies are used and the sound comes from different loudspeakers.

*iPod Adapter*

*\$193 installed*

Simply insert your iPod into the dash mounted Holder and the Volvo iPod adapter plays iPod audio through the car's audio system while charging your iPod. This is a hard wired solution that plays through the cars audio system. The Volvo Aux Adapter is compatible with all iPod models except the iPod Shuffle. Music files are controlled through the iPod click wheel. Volume can be adjusted through the radio or the steering wheel controls. The dash mounted holder is located to the left of the steering wheel.

## *Bluetooth Kit*

*\$770 installed*

Volvo's voice-controlled Hands-free kit with Bluetooth is a smart, simple way to talk on your cellular phone while in the car.

The system is simple to use. Just press the blue button and the Volvo Hands-free System will obey your orders. The system has perfect sound reproduction with interference reduction, generating an optimal call experience. The sound from the car's audio and navigation systems is lowered automatically during incoming and outgoing calls.

The voice-controlled menu can be used to:

- make calls via "voice marks" that can be stored in the system
- make calls via speed dial numbers
- request system help
- call someone by speaking the phone number

The system has voice recognition in several languages including English (US and UK), French (EU), Spanish, Italian and German.
