\$250

Extra Trade Value With Updated Maintenance Book

Keeping your car current with maintenance may help increase its resale or trade-in value. We guarantee it if you trade-in with us.

When trading in your current vehicle, this book is worth an additional \$250 towards the value of your trade if you have done all maintenance up to your current time/mileage. Just present this book after you have agreed upon a price for an additional \$250 savings.

All work must have been performed by LEGEND NISSAN and verified by our computer. Not good with any other offer. Limit one per vehicle. This is good when trading in at:

To All Of Our Customers

Legend Nissan is dedicated to giving each and every customer the finest quality service in the most efficient manner. This service menu has been prepared to help you maintain and enjoy your Nissan for many years to come. If at any time, our service is not what you would expect it to be, we urge you to contact us. We also would appreciate knowing when you feel our staff has served you well. Thank you for your business and your confidence in us.

Maintenance is Important

Scheduling your vehicle's maintenance at the recommended intervals will ensure your vehicle is in tip-top condition and may save you both time and money. The maintenance information in this booklet is designed to help you make sure your vehicle receives proper and timely maintenance. Failure to perform scheduled maintenance may exclude portions of your vehicle from warranty coverage and may reduce the performance, safety, reliability and/or resale value of your vehicle.

BG A/C Evaporator Cleaning Service

Over time, the air conditioning evaporator in your car accumulates bacteria, mold, spores, fungi, road grime, nicotine oils and debris. This condition causes foul odors and loss of heating/cooling efficiency. Using a unique cleaning solution, this service will restore your air conditioner's efficiency and freshens the interior air.

BG Air Conditioning Tune-up

In order to maintain the efficient operation of your air conditioning system, a *tune-up* is recommended every 2 years or 30,000 miles. An A/C tune-up includes:

- Clean condenser and evaporator drain
- Tighten compressor and condenser mounts
- Connect pressure gauges
- Recycle and recharge system
- Performance test
- Adjust compressor drive belt
- Test system for leaks at hoses, couplings and valves
- BG A/C Service Kit
- Refrigerant, failed parts and labor

BG Power Steering Service

Because your power steering fluid breaks down with continual use, we recommend it to be replaced every 24 months or 30,000 miles. A power steering service includes:

- Flushing out power steering system
- Replace fluid with fresh conditioned power steering fluid
- Inspection of steering system for any leaks or damaged parts

BG Brake Flush Service

Provides effective and complete brake fluid flush service. Combines pressure and vacuum throughout the entire system - all four wheels at once. This service is recommended every 2 years or 30,000 miles.

BG Engine Flush Service

Under normal driving conditions, internal engine parts can become coated with sludge and varnish deposits. After a routine oil change, some old contaminated oil remains in your engine. An experienced technician using a state-of-the-art machine, will perform a BG Engine Flush Service. First, a safe and effective cleaner is injected into the oil system. While the engine runs, sludge and deposits are broken up and filtered from the cleaning solution. When the cleaning process is complete, the cleaning solution along with any loosened residues are air blown from the system. A new oil filter, fresh motor oil and BG MOA are then installed.

RECOMMENDED ADDITIONAL SERVICES

BG Fuel Injection Service

Because deposits build up in your fuel injection system if not cleaned periodically, we recommend this service at regular intervals to help your engine performance and fuel mileage. Highly effective cleaners are applied by our technicians utilizing specialized equipment to clean your car's entire fuel induction system.

BG Throttle Plate Service

Using specialized equipment our technicians will quickly and effectively clean and service your throttle plate and air idle control valve by removing built up deposits. These deposits cause rough idle, surging, and poor throttle response. This service will restore lost power and performance and will reduce harmful exhaust emissions.

BG Transmission Flush

Using a state-of-the-art machine, one of our technicians will clean and flush harmful deposits from your car's transmission. This service cleans the transmission filter, screens, valve body and torque converter while removing the contaminated fluid and replacing it with new transmission fluid.

- Perform flush & fluid exchange
- Install BG Transmission Service Kit
- Road Test

BG Coolant System Flush

An important part of keeping the cooling system in top working condition involves draining and replacing the coolant every two years or 30,000 miles. The engine needs a good mixture of antifreeze in both Winter and Summer if using air conditioning. A cooling system tune-up includes:

- Flush cooling system
- Clean radiator heater core and block
- Pressure test system
- Failed parts and labor extra
- Install BG Coolant Flush Kit
- Install new antifreeze to min. 35° below
- Tighten hoses and belts

4-Wheel Alignment

Prices vary per vehicle

Tires also available at competitive prices

Service Department Hours

Monday - Friday 7:30 AM to 5:30 PM

Saturday 8:00 AM to 4:00 PM

Evening hours until 9:00 PM by appointment.

For after hours drop offs, please fill out a "night owl" envelope, lock your car, leave the keys in the envelope, "sign the envelope" and drop it in the mail slot in the back service garage door and call us in the morning. Ask us about late night pick-ups should you need it.

**All our maintenance services include
Dealer and Factory Recommendations based
on driving conditions for this area.**
