

PermaPlate Fiberguard®

Ultimate Fabric Protection By:

- ***PREVENTING STAINS FROM OIL AND WATER BASED SPILLS***
- ***ALLOWING QUICK AND EASY CLEAN UP***
- ***BONDING TO INDIVIDUAL FIBERS WITHOUT ALTERING TEXTURE, SCENT, OR COLOR OF THE TREATED FABRIC***

Spills, splatters, and everyday mishaps are almost unavoidable. Fiberguard gives you the advantage of intervening before minor accidents become permanent reminders. Designed to coat each fiber of your vehicle's carpet and fabric upholstery, Fiberguard's polymer based coating seals out stains from both oil and water based spills. Because Fiberguard bonds to individual fibers, the air spaces between fabric strands remain open and permit the upholstery to breathe. The texture, scent, and color of the original fabrics are not altered and spills slip into air pockets between fibers allowing for quick and easy clean up.
