

## PermaPlate Paintguard®

Ultimate Paint Protection Against:

- ***OXIDATION AND FADING CAUSED BY THE SUN'S POWERFUL ULTRA-VIOLET RAYS***
- ***CORROSION CAUSED BY SEA AND ROAD SALT, ACID RAIN, AND INDUSTRIAL FALLOUT***
- ***DISCOLORATION CAUSED BY BIRD DROPPINGS AND TREE SAP***

The quality and success of Paintguard stems from two decades of innovative product research and testing. Without protection, your vehicle's paint finish is easy prey for the sun's powerful ultraviolet rays--a hazard that can quickly cause oxidation and fading. With professional application, Paintguard's exclusive formula bonds with, and seals, the paint surface creating a continuous, durable protective finish. Our commitment to your vehicle's appearance begins with a professional application of the finest products available. To retain this good head start, we recommend the Perma-Plate Maintenance Kit. Available as part of the Perma-Plate protection system, our Paintguard Renewer and Wash Concentrate make it easy to maintain your vehicle's brilliant finish well into the future.

***Protection for what moves you!***
